The pedestrian routes within Cook Park have been installed to connect to the adjacent sidewalks of the Vine City neighborhood. This photograph is taken from the corner of Boone Blvd. and Walnut St.

Recent Activity

- The top coat of asphalt has been applied on Cook Park’s adjacent Walnut Street, Thurmond Street, and Elm Street. Striping designating traffic lanes and parking spaces have also been applied. (Photograph, upper right)
- The project’s two security cameras have been installed. Funded by Trust for Public Land donors, the cameras will be connected to the Atlanta Police Department’s city-wide system.
- Cook Park’s terraced pools and fountains are operating and currently aerating the stormwater collected from the streets of the surrounding neighborhood. (Photograph, lower right)

Upcoming Activity

- The construction team is completing the project’s internal sidewalk network by working from the interior towards the south of the site at Thurmond Street and Vine Street. The final concrete walks will connect the central plaza to the park’s outdoor fitness zone, south pavilion, and climbing boulders.
The last pieces of Cook Park’s landscape, including trees, shrubs, groundcover, and irrigation, are on site and continue to be installed on a daily basis. (Photograph to the right)

At this time, Cook Park is slated to be complete and open to the public in mid-December. As we get closer to completion, we will share information about an opening celebration.

Thank you for your continued interest in Cook Park. Please feel free to contact me with any questions.
