Project Description
The Richmond Wellness Trail Phase 1 Project will transform 1.1 miles of residential streets into a multi-modal, multi-benefit green infrastructure corridor.

History
From 2016-2017, Richmond’s National Park Service Urban Fellow worked extensively with the Richmond community to create and get feedback on a vision for the Richmond Wellness Trail. The Fellow finalized the Vision Plan in April, 2017. The Trust for Public Land, City of Richmond, and Community Partners are now working to make this vision a reality.

Funding
The Project is funded by generous partners, including:
» California Natural Resources Agency
» Strategic Growth Council
